REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: The primary reason for allowance of claims 1-6 is the claim 1 limitation for a communication intensity deciding part for deciding, according to a determination result from said power determining part, intensity of the optical signal to be emitted by said signal emitting part. The primary reason for allowance of claims 7-9 is the claim 7 limitation for a communication intensity deciding part for increasing intensity of the optical signal to be emitted by said optical signal emitting part when said slave flash determining part determines that said preliminary slave light has not been emitted. The primary reason for allowance of claims 10 and 12 is the claim limitation for a communication intensity deciding part for deciding, according to a measurement result from the photometry part, intensity of the optical signal to be emitted by said signal emitting part. The primary reason for allowance of claim 11 is the claim limitation that the photographing device sets intensity of the optical signal to be emitted by said dedicated signal emission device to be greater than the intensity of the optical signal to be emitted by the light/signal emission device. The primary reason for allowance of claim 13 is the claim limitation that the communication intensity deciding part sets signal intensity of the optical signal emitting part to be greater when emitted at times other than photography than at times of photography. The primary reason for allowance of claims 14-16 is the claim 14 limitation that when the slave flash device is set to be controlled, the communication intensity deciding part inhibits the signal emitting part from illuminating at the time of photographing.
